

LEC 400: Art History and Practices ***Past through Contemporary***

Meets: Wednesdays (see schedule for start date)

Time: 12:30am-2pm

Length of Course: 10 weeks

Instructor: Timothy Rees

This class explores the styles and history of realistic painting. It will familiarize students with skilled artists to encourage independent study. Branching away from the traditional art history class that explores the symbolism and meaning of works of art, this lecture class will explore the studio practices utilized to create them. The course will end with an overview of contemporary realist painters, in order to acclimate the student into the current art establishment.
