

Term 1

CDC 101, CDC 102, and LEC 100

Tuesdays 9am- 12pm

Thursdays 8:30am- 12pm

Length of Term: 10 weeks

The first term introduces the student to the materials of drawing, as well as a formal method of procedure used throughout the first year. The focus is on observational drawing, that is, setting aside what is known to faithfully render what is seen, without the need to understand the subject. The student will also begin to heavily consider composition in preparation for the following terms. The term is 10 weeks long, and the student may advance to Term 2 after successful completion of a Bargue Plate that satisfies the standards of the program.
