

Term 2

CDC 201, CDC 202, and LEC 200

Tuesdays 1pm- 4pm

Thursdays 1pm- 6pm

Length of Term: 10 weeks

The second term introduces the student to more complex aspects of drawing while utilizing the same procedure learned in the first term. The focus is on the more scientific elements of drawing, such as perspective and planes, light and shadow anatomy, knowledge of drapery folds, and anatomy of the human figure. The term is 10 weeks long, and the student may advance to Term 3 after successful completion of a still life that satisfies the standards of the program.
